

Github login

<https://github.com/ppundir/sample> visit this

click fork

u will get it forked like

<https://github.com/RitikRajpoot/sample.git>

install git windows (just do next next at all places)

git clone <https://github.com/ppundir/sample>

go to <https://git-scm.com/downloads>, download corresponding

in ur scripts folder inside python u should have pip

pip install vitrtualenv

python -m venv myenv

.\myenv\Scripts\activate

U should get prompt for this env activation : example : (myenv) C:\Users\HP>

Go to git.exe location in ur installation on system and clone repo of urs

Example:

.\Program Files\Git\bin\git.exe" clone <https://github.com/RitikRajpoot/sample.git>

Cd sample

C:\sample>"C:\Users\HP\myenv\Scripts\pip.exe" install -r requirements.txt
